

**NEW YORK STATE ASSOCIATION OF MPOs
MODELING WORKING GROUP
June 28, 2019**

**Conference Call
9:30 AM – 10:30 AM**

MEETING NOTES

Participating

- Chris O’Neill, CDTC (Chair)
- Chris Bauer, CDTC
- Lauren Burns, OCTC
- Jen Ceponis, CDTC
- Michael Chiume, NYMTC
- Mark Debal, DCTC
- Rich Denbow, CS
- Jason Deshaies, SMTC
- Emily Dozier, DCTC
- Mark Grainer, NYSDOT
- Eric Krans, AVAIL
- Catherine Lawson, AVAIL
- Alex Muro, AVAIL
- Munnesh Patel, NYMTC
- Dylan Tuttle, DCTC
- Alan Warde, NYSDOT

1. Introductions

Alex Muro (AVAIL) opened the meeting and welcomed the participants.

2. NPMRDS Tools – On Dev

The AVAIL team provided an update on recent tool development and follow-up from the June 19 in-person MWG meeting in Albany.

- More bottlenecks are available for viewing. The team will continue with updates.
- The team showed some of the bottleneck views and a bottleneck filter, and showed delay using the federal PHED measure.
- They are working on a filter for reporting data. Emily Dozier suggested adding a reporting threshold so the data provided in the view meets a pre-determined completeness level.
- The team discussed the types of reports that are available and comparisons that can be done, e.g., speed vs. hours of delay.

- Access to expanded coverage data is now available. The team will work this into other views and into the measures that don't require posted speed limits for each segment (which is not included in the dataset).
- For upcoming work, the team will move route creation into the macro tool and will continue work on OSM conflation. This has been more time consuming than anticipated so the team is shifting resources to get it completed.
- There are differences between the CSV files and shapefiles. The WG discussed the differences.

3. Wrap-up and Next Meeting

The next MWG meeting will take place on July 26, 2019.
